Recap, midterm exam

Biometrics

What is Biometrics (biometric recognition)?

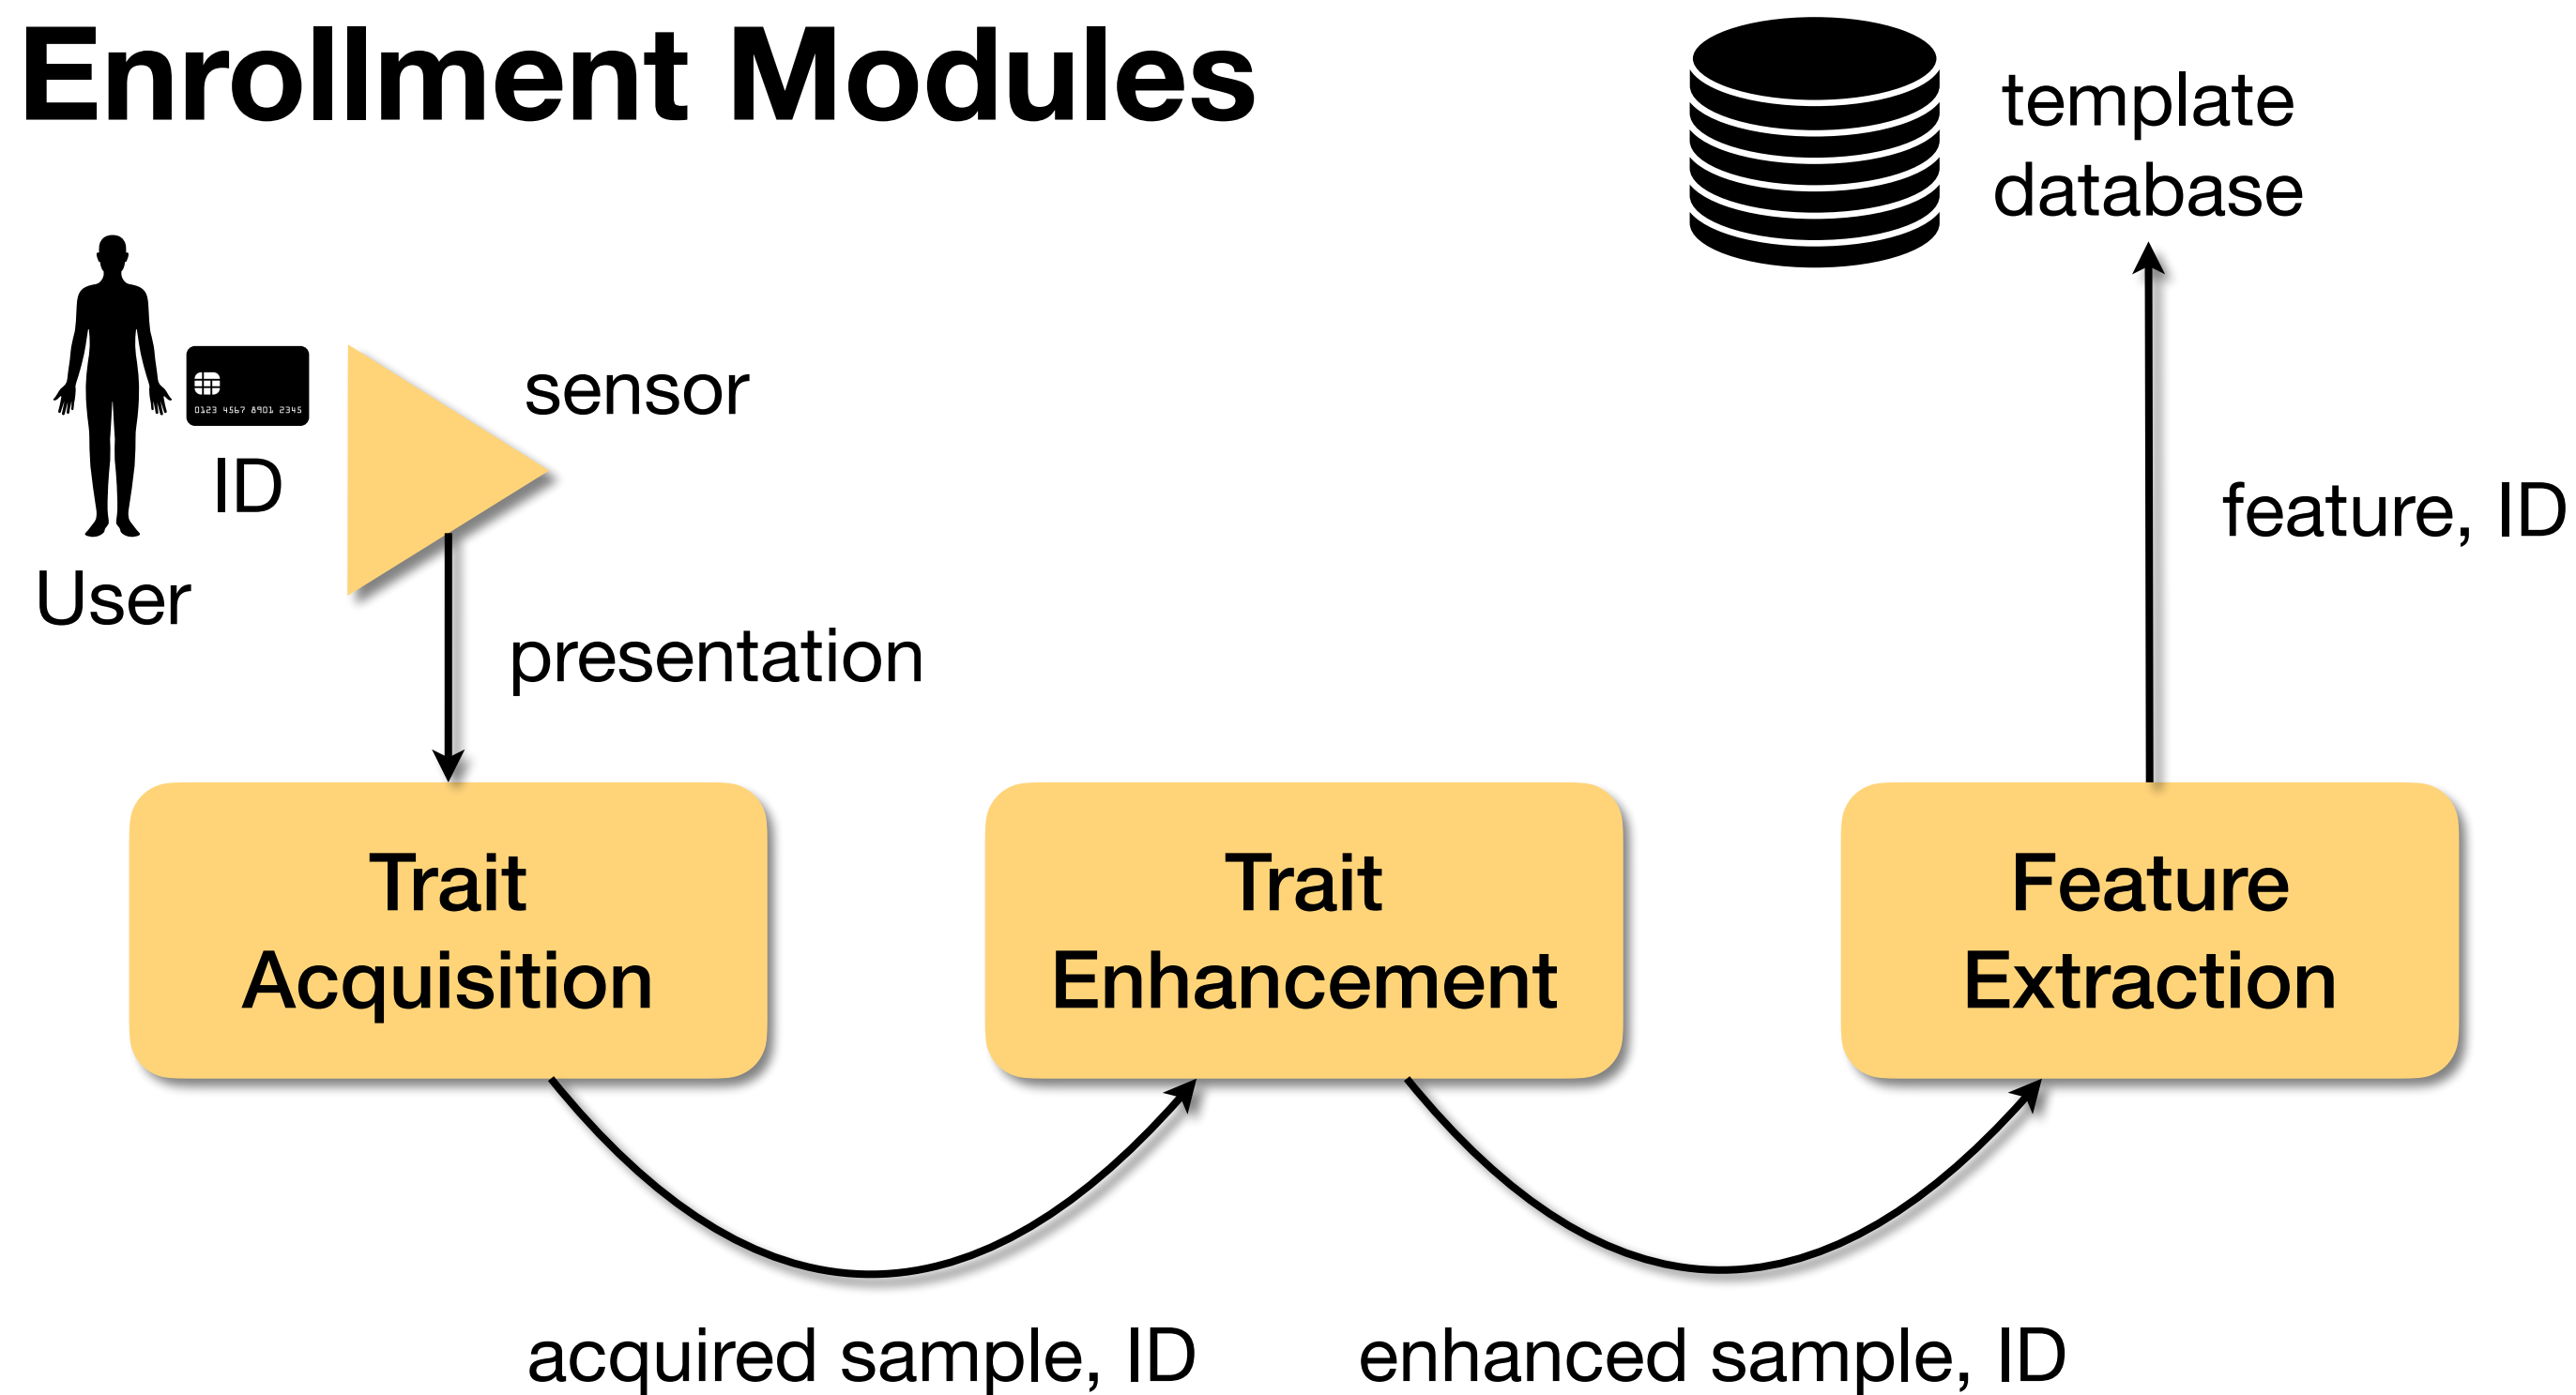

What are the types of biometric recognition?

What is a biometric system?

What are the typical modules of a biometric system?

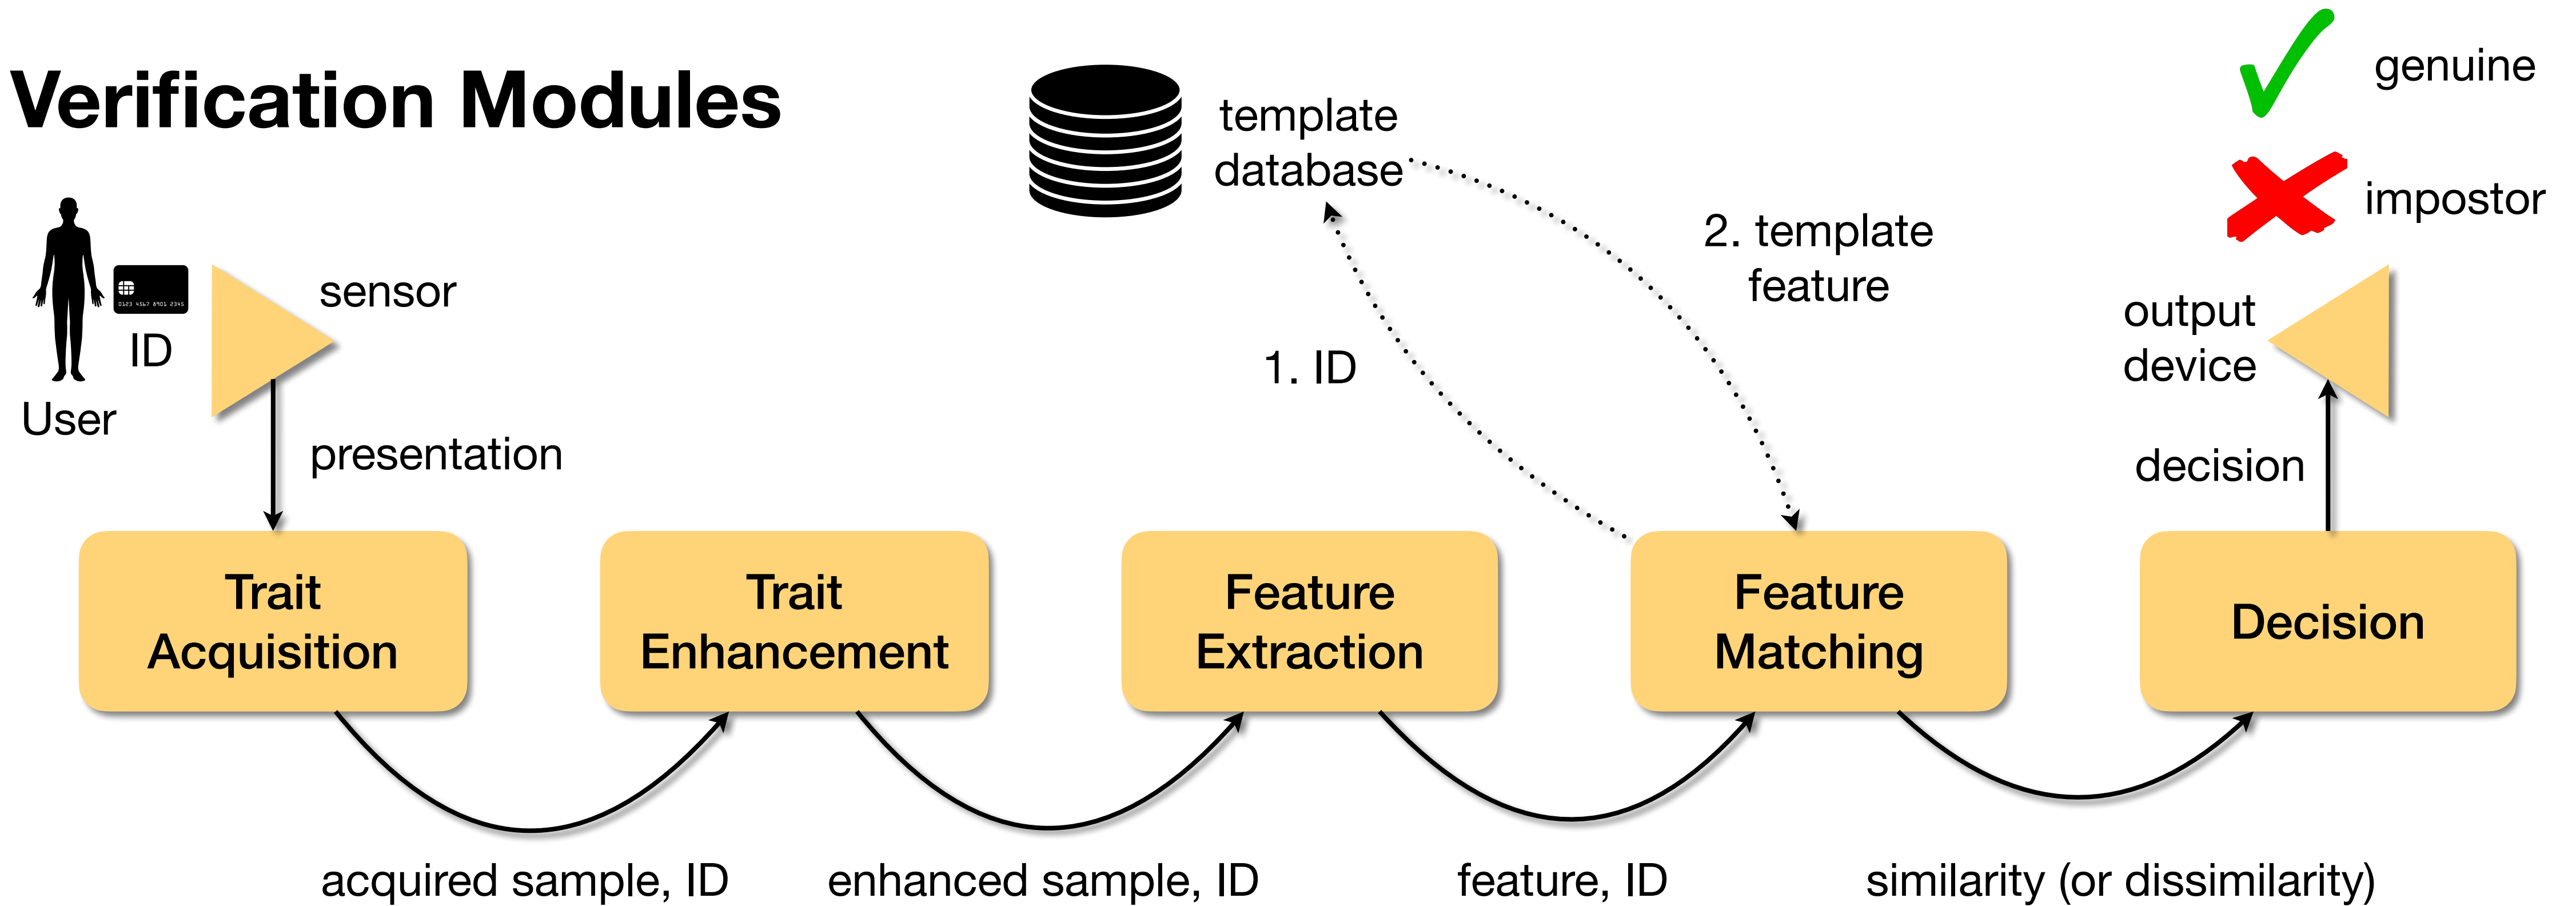

Biometric Systems

Enrollment Modules

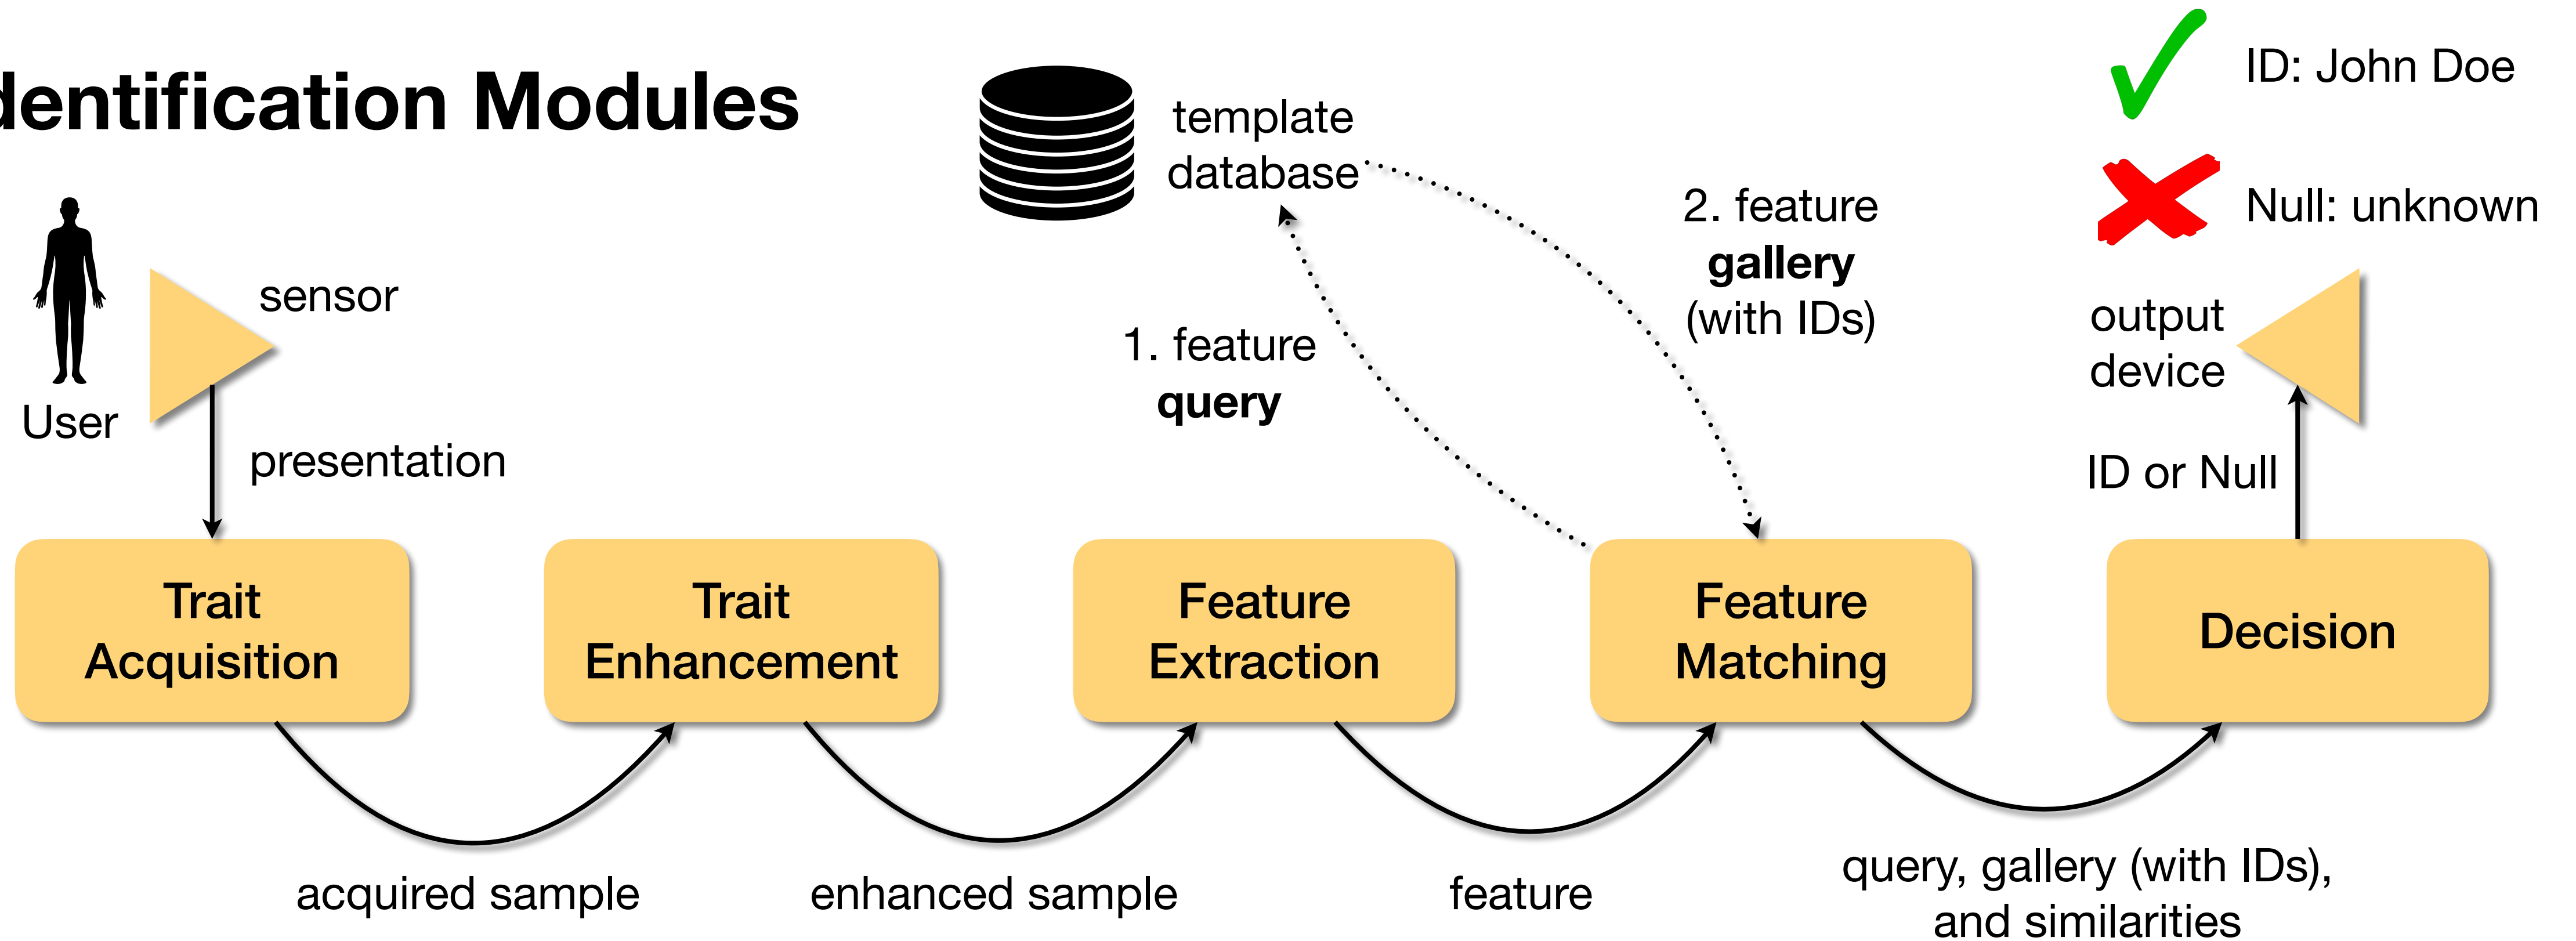

Biometric Systems

Verification Modules

Biometric Systems

Identification Modules

Recap, midterm exam

Utility

Why do we use Biometrics?

What are the pros and cons of using Biometrics?

Why do we use computers in Biometrics?

Traits

What is a biometric trait?

What is not a biometric trait?

What should one consider when choosing traits?

Recap, midterm exam

Ethical aspects

Misuse, abuse, and bias

Function creep

Covert deployment

Errors and attacks

Denial of access, intrusion, and repudiation

Impersonation, obfuscation, spoofing, hill climbing, and master keys

Closed-set versus open-set

Recap, midterm exam

Metrics

How do we compare two or more systems?

d-prime and AUC

Genuine versus impostor pairs

Similarity versus distance-based scores

Recap, midterm exam

Fingerprints

Epigenetic traits

Ridges and valleys

Level-1, level-2 and level-3 features

Examples and utility

Types of sensors

Capacitive (standard and active), optical, pressure, thermal, ultrasound, and touchless

Project

Discussion

What is your topic?

Who are your partners?

How are you going to do it?

Please visit

<https://forms.gle/UULoNmQw1aRzu87A6>

Assignments

Assignment 1

Wrong AUC curves

Assignment 2

Fingerprint recognition

Open next week

What's Next?

Midterm exam

In class on Wednesday

On paper

One-page cheat sheet is allowed
